

Stainless Steel Compressed Air Filters

For the most demanding environments

Protect your equipment from contamination:

Finite Filter's stainless steel compressed air filters protect sensitive equipment and instruments from the dirt, water, and oil usually found in compressed air and other gases. These filters will remove contaminants at a very high efficiency - up to 99.995% for submicronic particles and droplets. Coalesced liquid drips off the filter cartridge to the drain as additional contamination enters the filter, allowing the filter to remove liquids without the loss of efficiency or flow capacity. These filters are constructed of 304 stainless steel and are designed to withstand the harshest environments.

Product Features:

- All 304 stainless steel construction
- Remove up to 99.995% of oil, water and solids from compressed air and other gases
- Continuously trap and drain liquids
- Remove trace amounts oil vapor with adsorbent cartridges

Applications:

- Refineries
- Chemical plants
- Steel and metal fabrication plants
- General industrial

ENGINEERING YOUR SUCCESS.

Specifications

Stainless Steel Housings	SN3L	SN4L
Port Size	3/4" NPT	1" NPT
Max Pressure	250 PSIG*	250 PSIG*
Height	4" W x 12" L	4" W x 12" L
Weight	14 lbs.	13 lbs.
Materials		
Head	304 Stainless Steel	
Bowl	304 Stainless Steel	
Internals	Stainless Steel	
Seals	Fluorocarbon	
Drain Port	1/8" NPSM (auto drain option available)	

*Max Pressure is limited to 175 PSIG with the Auto Drain Option.
